Features

gloCOM GO Meeting Module

Our newest feature, the gloCOM GO Meeting Module, provides both gloCOM and Meeting in one application🔗

When users create and start a Meeting in the gloCOM GO app, the Meeting window opens directly, without requiring the launch of another app like in previous versions🔗

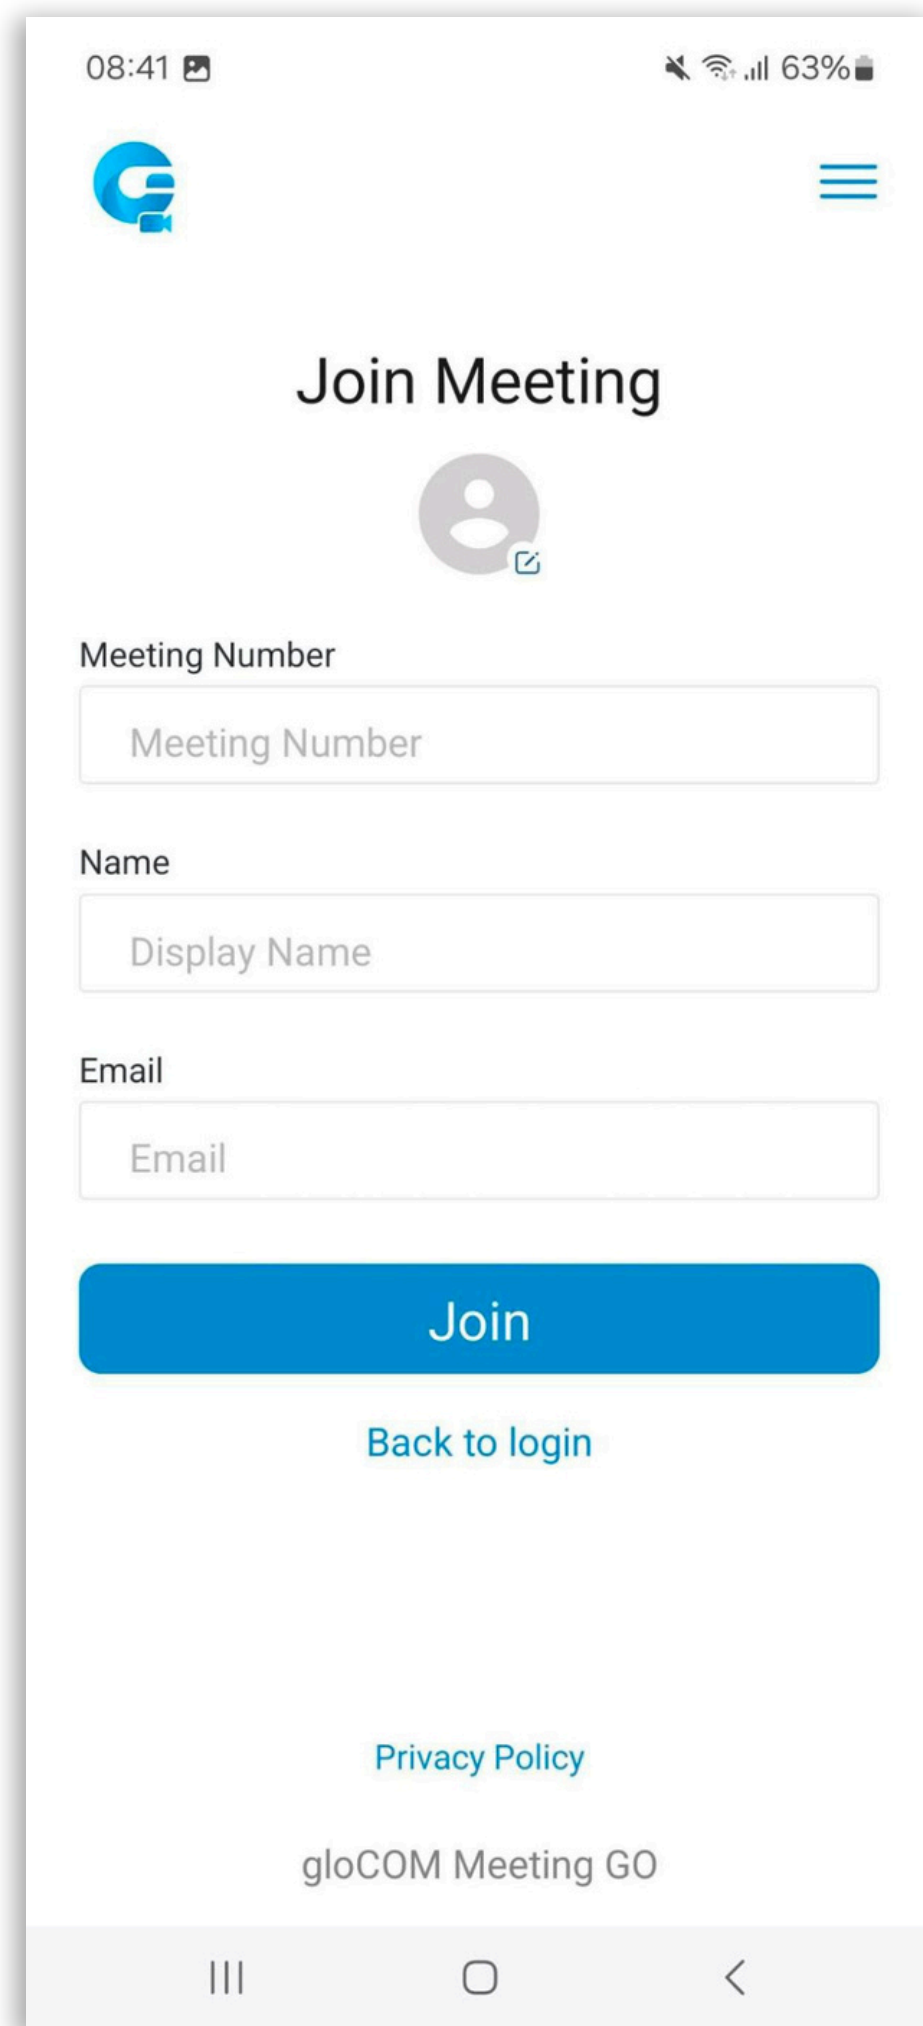

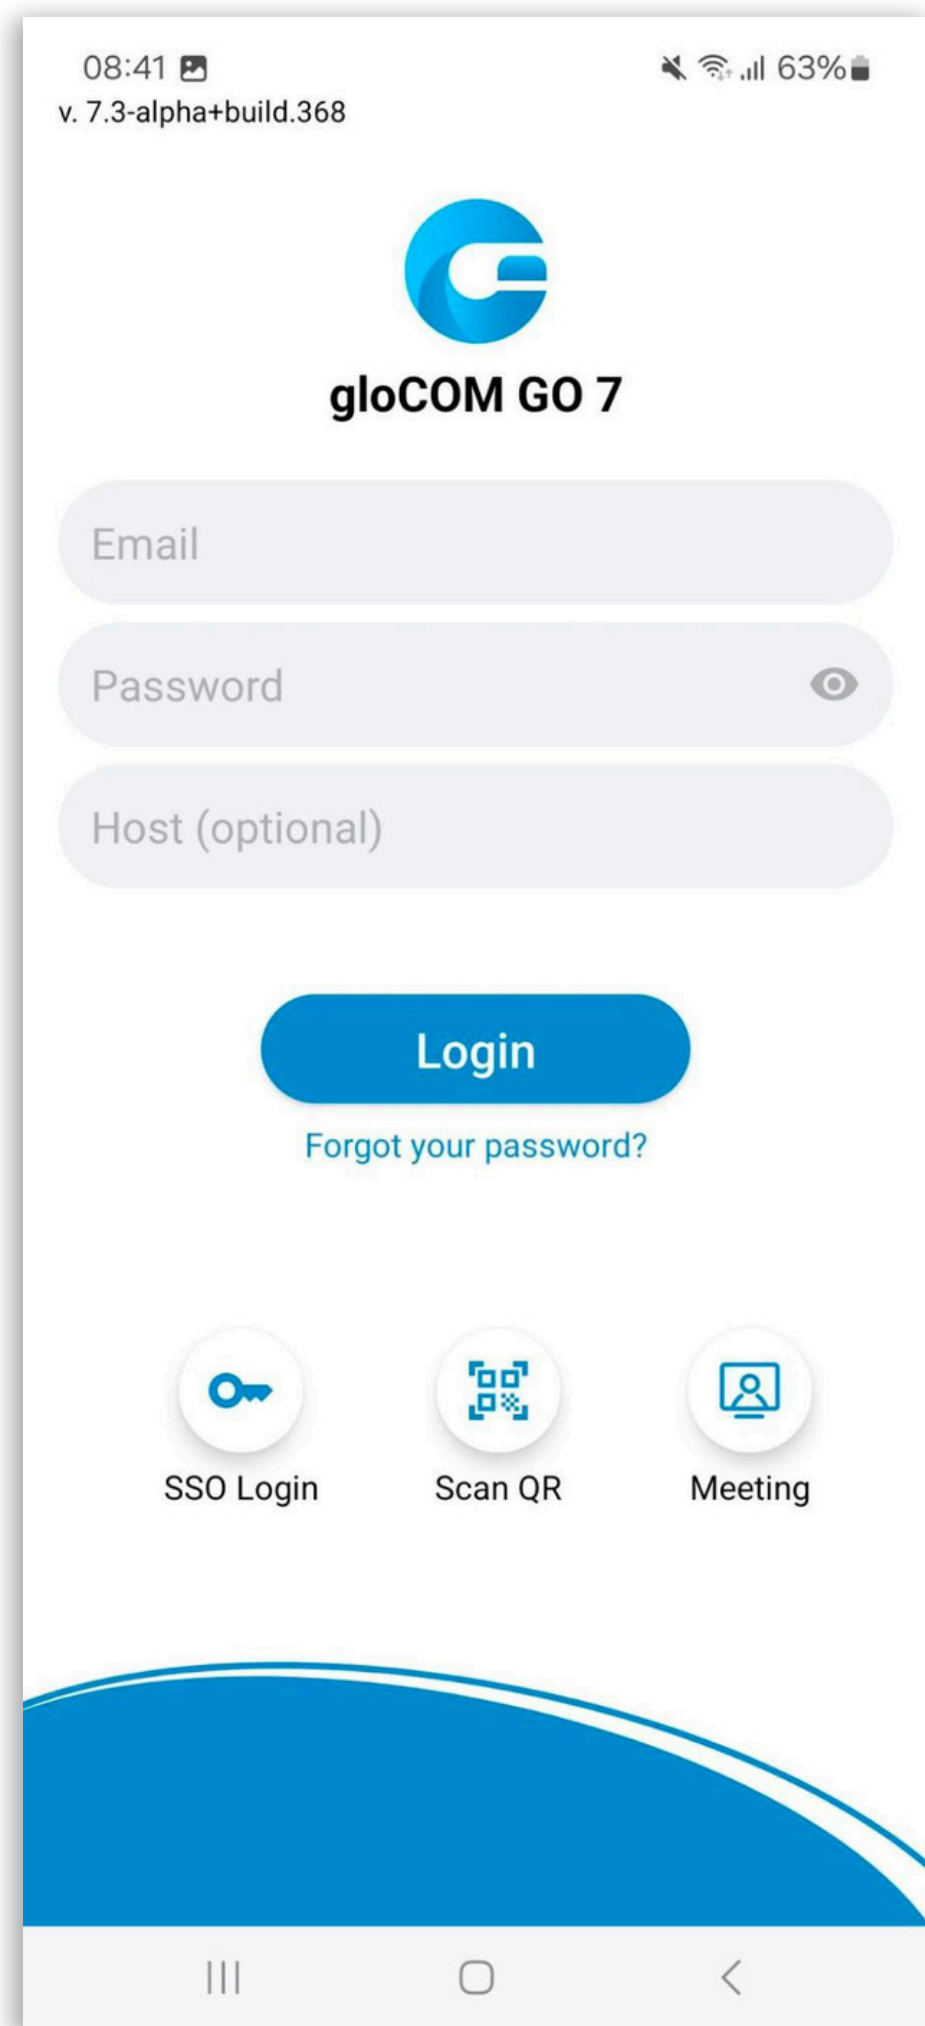

The Picture-in-Picture (PiP) feature enables users to minimize the meeting screen. With PiP, users can continue to view the meeting screen in a smaller window overlaying other applications, enabling effortless multitasking and enhancing productivity during meetings.

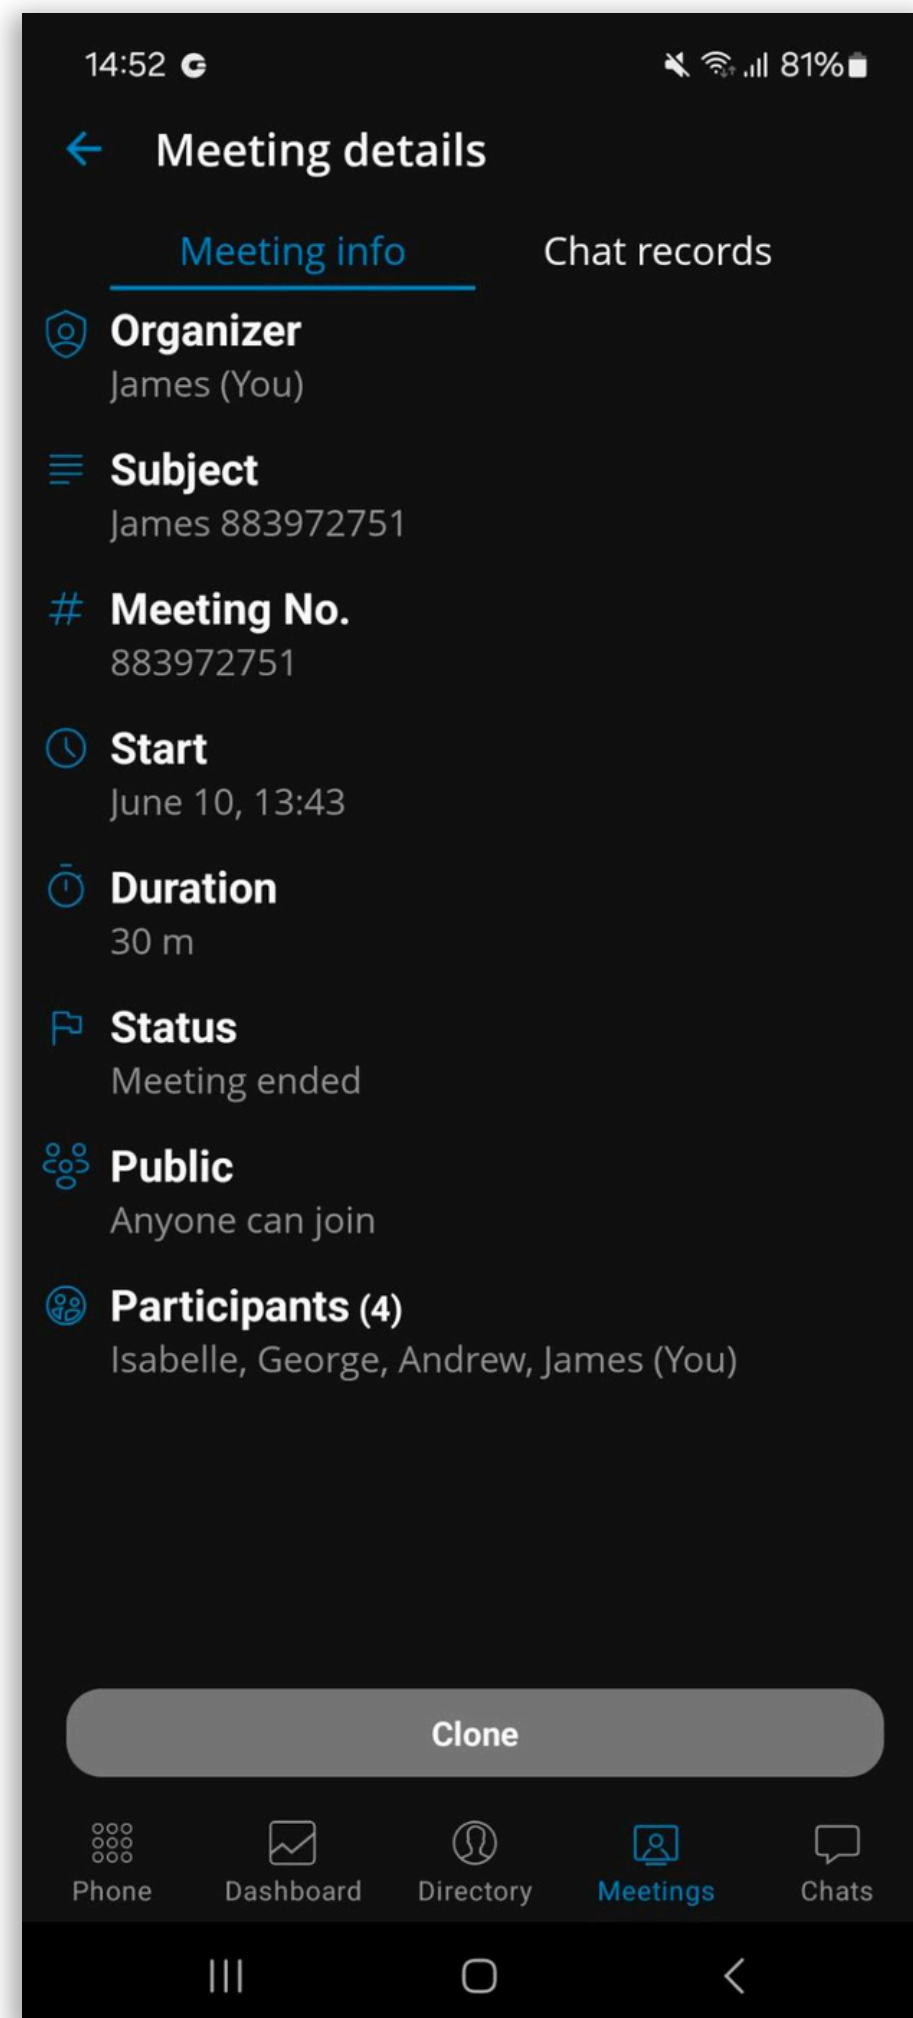

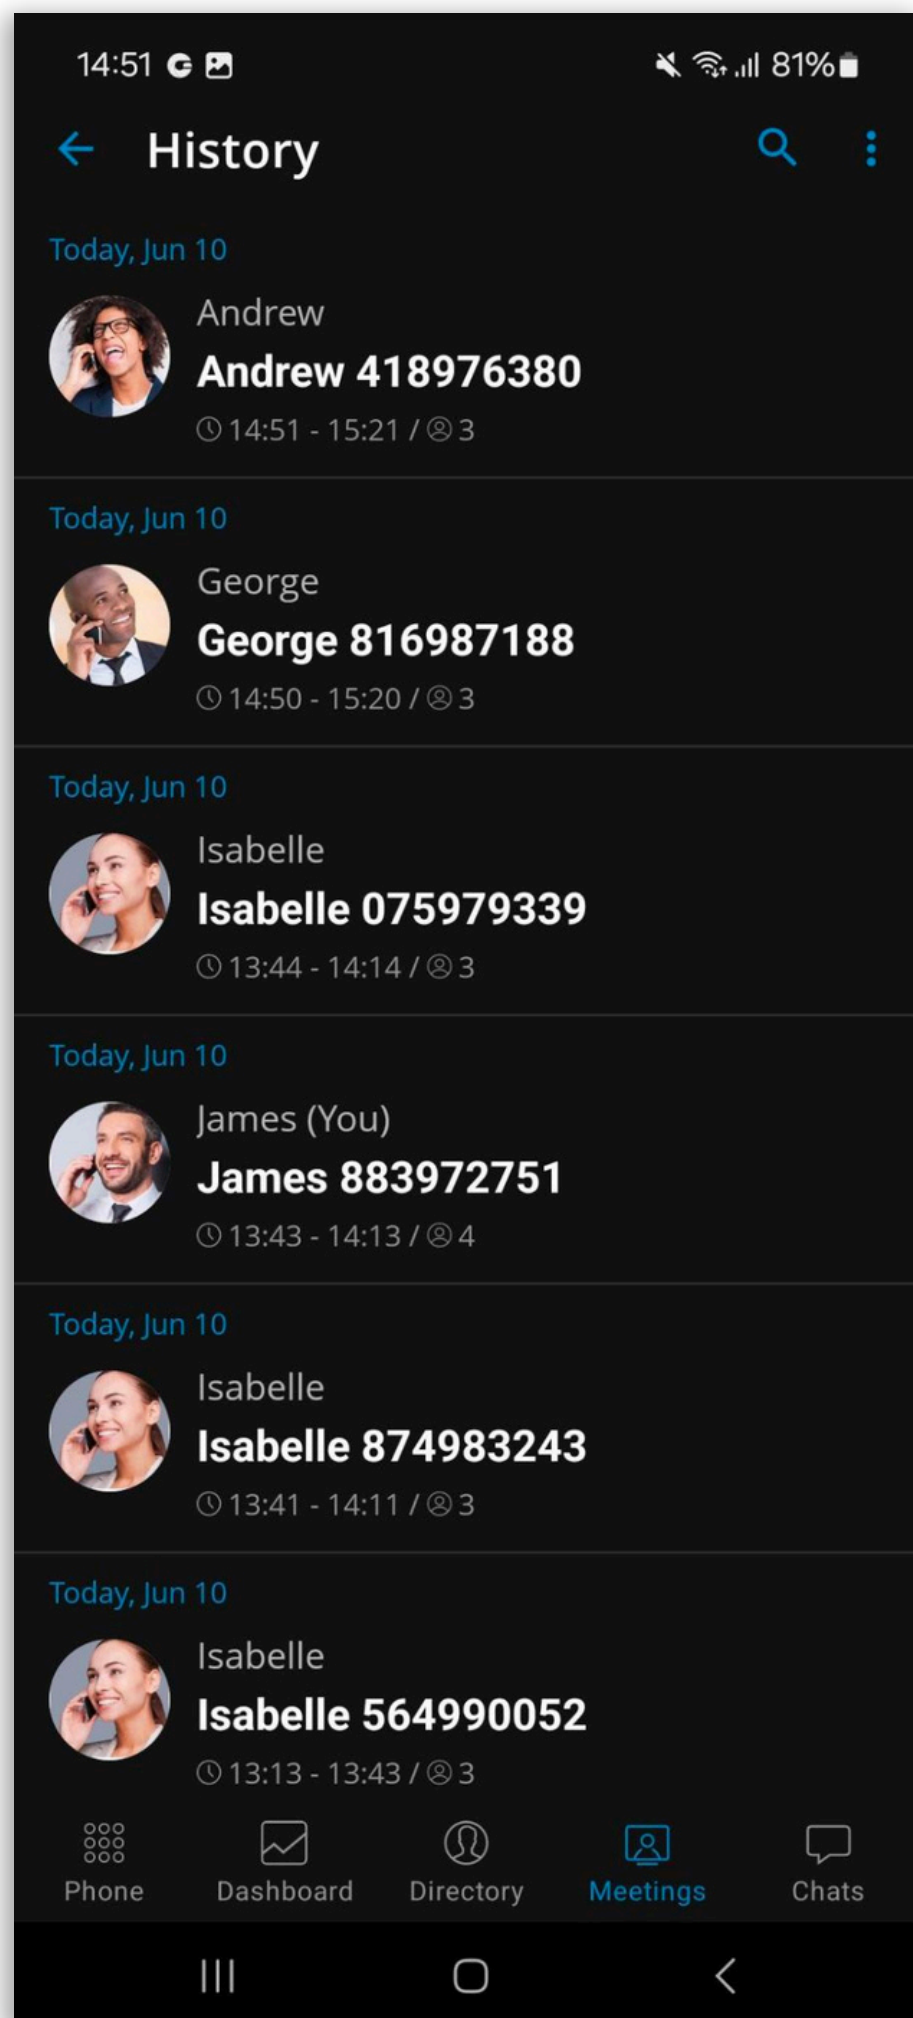

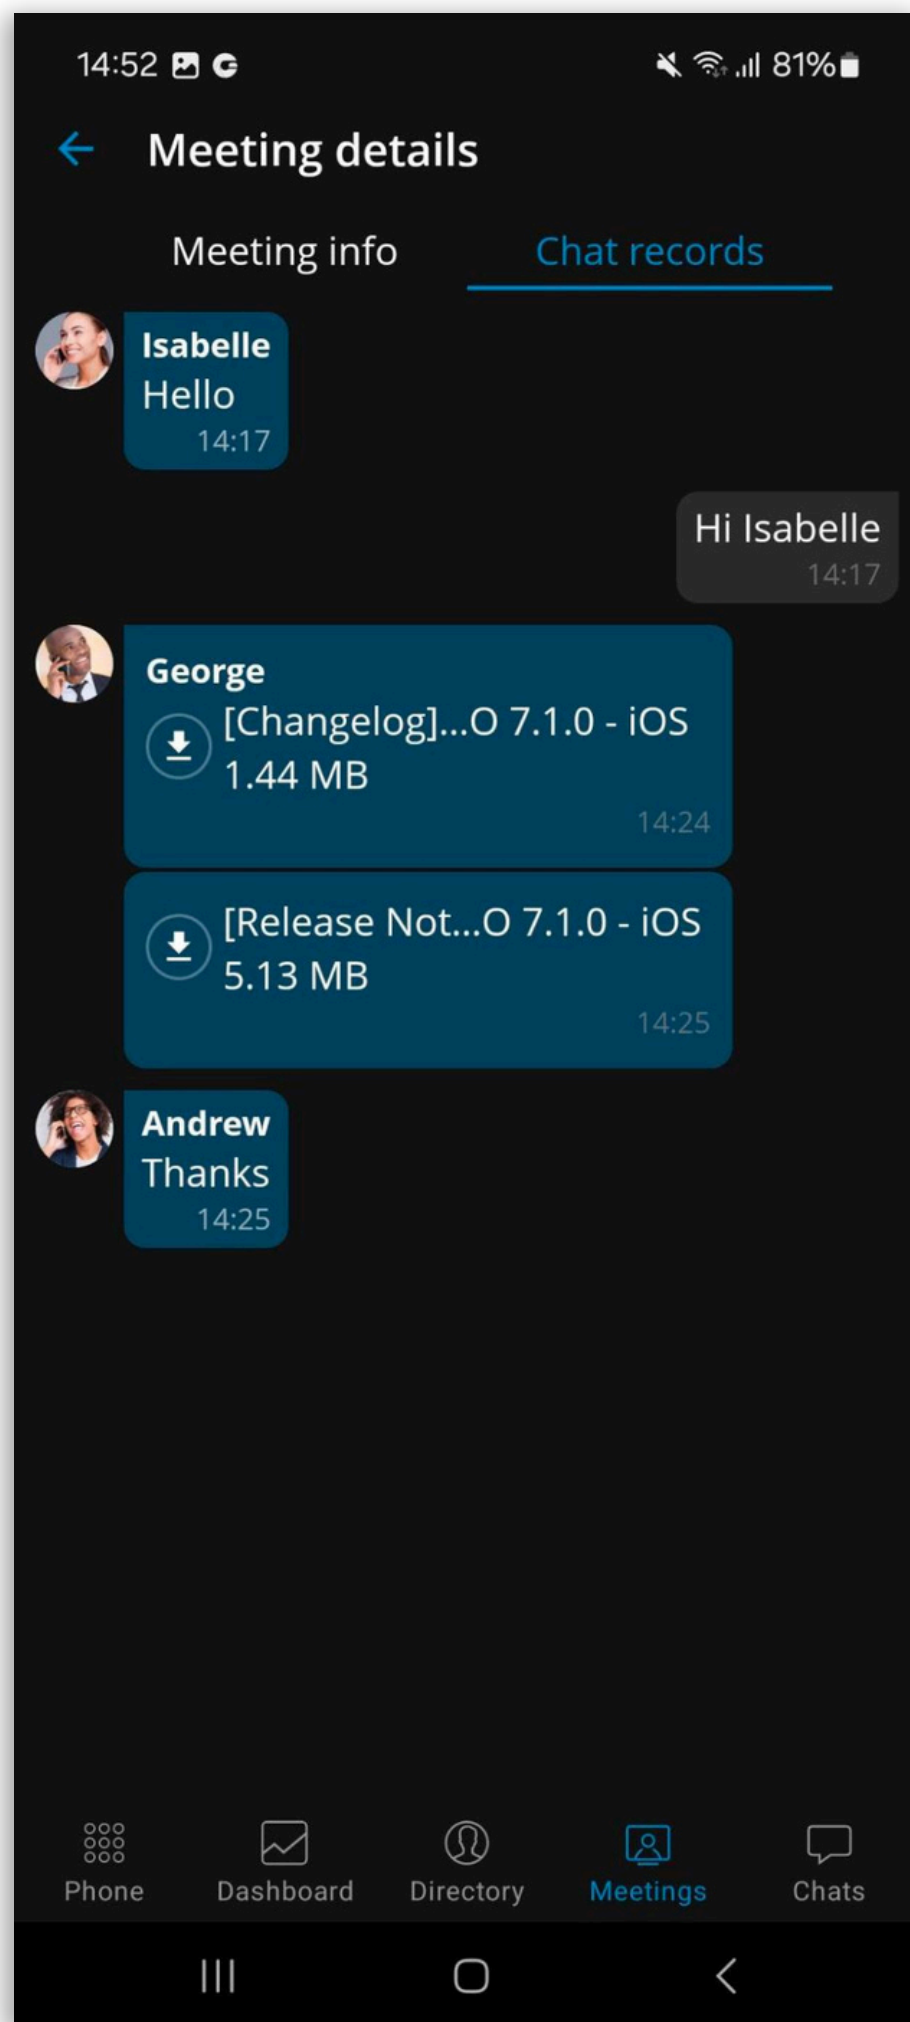

The login screen has an option that enables users to log into a meeting as a guest without having to log into the gloCOM GO app by simply providing a meeting number, name, and email

Show chat history in the previous meetings list

This feature enhances the user experience by providing easy access to past meeting information and displaying all messages exchanged during each session in Chat Records.
